

# THE BREAD AND BUTTER

**YOU ASK FOR IT,  
WE DEVELOP IT.**

# MEGA<sup>TM</sup> COMPOSITES

## PRODUCT BENEFITS

- Excellent thread protection.
- API and Premium connections.
- Heavy gage steel ensures rugged resistance to impact.
- Precision cut CNC thread.
- Closed end liftable design.

MSI Products' MEGA COMPOSITE thread protectors offer the advantages of two materials: the corrosion resistance of plastics, along with the impact resistance of steel. NC cut to fit your thread.

## RECOMMENDED USAGE

When long-term protection is needed.  
Thread impact protection.  
Large OD application.  
Offshore applications.

## APPLICATIONS

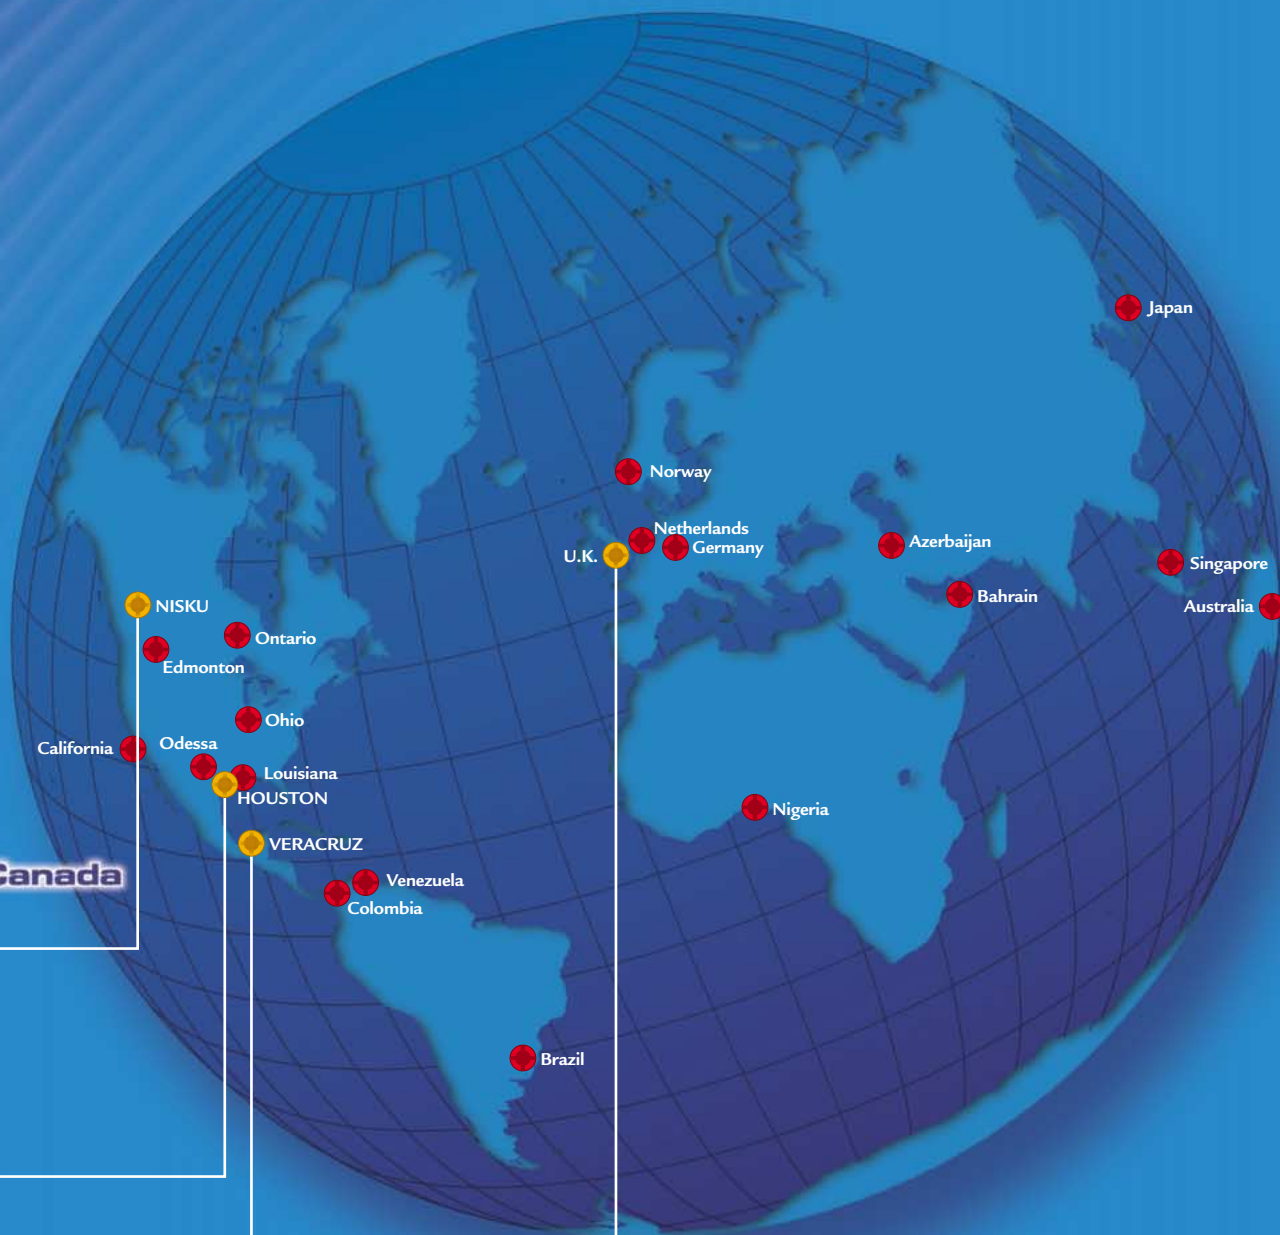

Casing: 5" through 20"

# CUSTOM MOLDING

MSI Products has manufactured an impressive array of proprietary and custom injection-molded products for more than 20 years. MSI Products specializes in producing high-performance parts from commodity resins as well as engineering-grade thermoplastics and polymer alloys. We operate large-capacity presses equipped with state-of-the-art controls and robotic handling systems for cycle consistency, but more importantly, our personnel understand every aspect of the injection molding process. With an array of different presses rated from 200 to 720 tons and with shot capacities from 20 to 260 oz., we are prepared to meet your deadline requirements. We operate CNC lathes to provide any threading or finish machining your parts might require, as well as hot-stamp equipment for heat-staking in assembly. Best of all, the MSI Products' personnel who will mold your products have in-depth experience running virtually all engineering and commodity-grade thermoplastic resins and polymer alloys.

Need a custom part? We'll develop it.
